CHANGING THE FUTURE OF SCREENING

The heavy-duty M413 trommel provides an ideal screening solution for the toughest of applications. With its ability to process material up to 600mm (24") in size this unit can be used to screen sticky overburden, construction + demolition waste, rip-rap and much more. The clever chassis design and hydraulic folding product belts make this unit a breeze to transport from one site to another.

The M413 utilizes a 2-section drum allowing the MDS drum cleaner to be used in the fines section this helps keep the openings clean in the harshest conditions, while a bolt-in / bolt-out screen design in the mid-product offers improved flexibility in material sizing.

BUILT TO EXCEL IN A WIDE RANGE OF APPLICATIONS ALL YEAR-ROUND

DRUMS & SCREENS

The M413 uses the same screens as M412 in its fines section. Mid-Product section uses a different style of screens. There are various screen sizes that can be chosen for the M413 Trommel which are shown below

Drum cleaners only work with fully welded drums and in the fines section. Fully Welded options are 75mm (3"), 100mm (4"), 125mm (5") and 150mm (6").

Drum frame with changeable screens is recommended for free-flowing or abrasive applications..

Fines
1" (25mm)-6" (150mm)

Mid Product
3" (75mm)-12" (300mm)

MDS M413 Trommels are made up of a drum with a 2.9m Fines section and 1.7m Mid Product Section. There are various combinations of drums that can be set up on the machine. These are either frames with changeable screens or fully welded drums. The exact configuration depends on the application and requirements of the customer.
